This year Junglefy is the sponsor of the City of Sydney's Live Green House. The Live Green House is a modular mobile home that showcases sustainable building practices and technologies that can be incorporated into new builds or retrofitted into existing buildings. Junglefy showcased three technologies; the ecoVert(TM) Home, the ecoVert(TM) Pro and a dog house with a green roof. All three technologies attracted a fantastic response and opened peoples minds to the opportunites of incorporating such technologies into their houses or apartments.

Please click on the following links for further details and a time lapse of the installation. [Live Green House](#) and [Live Green Time Lapse](#)

The Live Green house will be on display at Martin Place in Sydney on the 9th & 10th of November and again during Chinese New Year celebrations from the 12th - 14th of February 2010.
