

Green Roof and Green Wall Maintenance

Every type of Green Roof and Green Wall system will require maintenance in some form or another,
(a) initially for a period following the installation of the plants, and/or
(b) ongoing maintenance to keep the green roof/wall flourishing.

A successful and thought through design will ensure maintenance is kept to a minimum whilst the aesthetic impact of the system is maximised. All of Junglefy's installations come with a standard 8 week establishment period. Junglefy recommends extending this maintenance period for at least one year (preferably two) to ensure the green roof or wall investment flourishes. A tailor made maintenance program is drafted for each roof and wall installation. All maintenance is conducted by our team of qualified horticulturalists.
