

Junglefy Green Roof Solutions

A Green Roof can help preserve green space, control storm water runoff, reduce a building's energy costs, and provide beauty for industrial, commercial, and residential buildings.

What are the advantages of a Green Roof?

- Extend the lifespan of your roof
- Save on energy costs
- Reduce stormwater run-off
- Reduce CO2 emissions.
- Contribute to biodiversity.
- Create a green urban environment

Why choose Junglefy for your Green Roof system:

- Accredited Green Roof installer
- Superior lightweight construction
- Growing media uses 100% natural materials
- Award winning irrigation system
- Unsurpassed drainage & roof protection
- Intelligent re-wetting system
